SUMMARY

Hey, I'm Gaurav Dhungana, 17 years old from Nepal. I'm a frontend developer who's all about that clean, smooth web experience. I rock HTML, CSS, and JavaScript to build slick interfaces, but I mainly vibe with React for that next-level UI magic. I also know my way around Express and MongoDB, so I can handle the backend side too and make sure everything runs tight. Just out here crafting cool web stuff and leveling up every day.
